Harley 6 Pin

USB VIDEOSCOPE

1. View & Record Video in Full VGA Resolution 30 Frames per Second
2. Take Snapshots and Save Images Right to Your Mac Diagnostic Tool
3. Ultra-Small 7mm Camera - IP67 Certified for Immersion, allows for use in wet, fluid-soaked spaces
4. Four Adjustable LED Lights Offer Superior Brightness, Light Weight, Ergonomic Design
5. Works with ET-R8+ and ET-10+

Description:

This USB Videoscope is the perfect tool for viewing and capturing video and still images of hard-to-reach areas. With its fluid resistant 7mm head, LED illumination and side view angle mirrors, dark, fluid soaked and hard to reach areas is no problem!

The Repairfy Videoscope/Boscopescope is the perfect tool for viewing and capturing video and still images of hard-to-reach areas. With its fluid resistant 7 mm head, LED illumination and side view angle mirrors, dark, fluid soaked and hard to reach areas is no problem!

Features:

Now with side view angle mirrors (35/45/60 degrees)
View & record video in full VGA resolution @ 30 frames per second
Take snapshots and save images right to your Mac scan tool
30" flexible articulating probe USB cable allows for easy inspection & access to hard-to-reach areas

Ultra-small 7mm camera – IP67 certified for immersion, allows for use in wet, fluid-soaked spaces
7mm camera head easily fits into most spark plug holes for inspection

Functions:

1. View, record and save images and videos
2. Take images easily with one-click snapshot button
3. Easy to adjust the strength of light(6 levels)
4. View & save images/ videos on Mac Tools

Specifications

Image Type: Live Video/Image Stills
Frame Rate: 30 fps
Image Sensor: 1/12" CMOS
Lens Diameter: 7mm
White Balance: Automatic
Exposure: Automatic
Light Source: 6 Adjustable LEDs
Unit Length: 3.37 ft
Cable Length: 6.56 ft
Cable Length: 30"
Min. Bending Radius: 50mm
Viewable angle: 60°C-65°C
Cable length: 2M

BATTERY TESTER

Bluetooth battery tester Compatible with ET-R8+ and ET-R10+.
6V, 12V (lead acid, GEL and AGM battery) Ripple detection, battery test, electr. current test, starter test, charging system test, voltage test
265x135x42mm
0.3kgx

HGV KIT

The HGV add on kit is a special package for commercial vehicles. This is an extension of the asTech All in One software for commercial vehicles. This diagnostic device has been developed and adapted exclusively for commercial vehicles. A wide range of diagnostic software and accurate test data from numerous manufacturers such as DAF, HYUNDAI, ISUZU, IVECO, MAN, MERCEDES-BENZ, RENAULT, SCANIA or VOLVO optimally support your work.

- Time maintenance
- Engine Reset Transmission reset
- Delay Reset
- Oil Change
- Shaft oil reset
- AD blue stand and consumption
- Vehicle speed limit settings
- Limiting the rotational speed of the vehicle
- Vehicle fuel consumption

HGV pack for ET-R10+
Non-standard connector set and HGV software activation card (1 year)

HGV renewal software card
HGV software (1 year subscription)

EV KIT

The Set includes 25 adaptor cables for the connection to the high voltage battery and jumper cables that enable a vehicle coverage of more than 95%

- Supports various battery diagnostic methods
- Quickly reads battery pack information
- Improves repair efficiency
- Diagnostic report via email

Battery Diagnostic Methods

Supports different battery diagnostic methods: Adaptor cable diagnostics, OBD port diagnostics and jumper cable diagnostics.

Battery pack information

Quickly reads battery pack information such as the number of battery pack modules, SOC, SOH,

temperature, individual cell voltage and temperature of each module.

Streaming battery data

Streaming battery data helps pinpoint problems and improve repair efficiency.

Diagnostic report

The battery pack diagnostic report can be printed and emailed.

The following Licences are bought from Mac directly

Licencing	RRP £ ex VAT
ETR8 Local Licence after year 18 months	£ 677.42
ETR10 Local Licence after 3 years	£ 677.42

REMOTE SERVICES

- Repairify Remote services allows the customer to access OE tools for vehicles that feature a Security Gateway or that cannot be resolved using the ETR10 locally.
- Using the same VCI, the customer raises a request on the asTech App and asTech will then pick up the job remotely and pair the car side VCI (from the ETR10) with a tool in their datacentre. Allowing them to scan, diagnose, program or calibrate the vehicle or part remotely.

Scan	Price	Discount
Pre-Post Scan incl DTC	£49.99	£39.99
Calibration	£99.95	£79.96
Calibration and Coding	£119.95	£95.96
Programming / Coding	£99.95	£79.96
Special Configuration and Investigation	£49.99	£39.99

Subject to T&Cs. VAT applies.

* Repairify will provide a How to Guide on activation and walk the technician through the process of submitting a job
